

# Pandemic Response and Safety Grant Program

## Round One: Eligible Industry Groups

---

### Small Business Size Standards by NAICS for Eligible Industries

The Pandemic Response and Safety (PRS) Grant Program provides grants to food processors, distributors, and producers that meet small business size standards and farmers markets.

In general, the Small Business Administration (SBA) size standards define whether a business entity is small and, thus, eligible for Government programs and preferences reserved for “small business” concerns. Size standards have been established for types of economic activity, or industry, generally under the North American Industry Classification System (NAICS). For the purpose of PRS, the small business size qualifications for the eligible industries with NAICS codes align with the SBA guidelines except for specialty crop producers, where SBA set the threshold for all agriculture producers, regardless of specific production segment, at \$1 million. USDA’s analysis of operations producing specialty crops showed that the high value crops meant that a higher revenue level was needed to support a small full-time operation than agricultural producers in general. USDA therefore set the eligibility threshold for specialty crop small business producers at \$5 million. To see a list of agricultural products classified as specialty crops, please visit <https://www.ams.usda.gov/services/grants/scbgp/specialty-crop>. A similar review of aquaculture, finfish farming, and shellfish farming operations suggests that this analysis would also be applicable to those operations. Because of similarities, the small business threshold for aquaculture, farmed finfish, and farmed shellfish producers is set at \$5 million. Visit the United States Census Bureau ([www.census.gov/naics](http://www.census.gov/naics)) for more information about NAICS code industry descriptions.

Industries included detailed below are eligible to apply for the first round of PRS grant funds. The number of employees or annual receipts indicates the maximum allowed for a concern and its affiliates to be considered small. An operation that could be classified under more than one NAICS code may choose between them for purposes of this grant.

- Producer NAICS codes are listed under Subsectors 111 and 112—Production.
- Processor NAICS codes are listed under Subsector 115 – Post-Harvest Crop Activities and 311—Food Manufacturing.
- Distributor NAICS codes are listed under Subsector 424—Merchant Wholesalers, Nondurable Goods and Subsector 493 – Warehousing and Storage.
- For the purposes of PRS, all Farmers Markets are considered as small entities eligible to apply for funds.
- Production and processing activities unrelated to human food, such as ornamental fish production or refrigeration and storage of fur, are not eligible to apply for funds.
